

PARKING GARAGE REPAIR & PROTECTION

Project: Administration Garage #1
Trauma Garage #2

Owner: Medical Facility
Galveston, Texas

System: SikaFloor 450 / 455
Sika Elastocolor

Area: 80,000 Sq. Ft.

Completed: 1999

The existing traffic deck membrane on the top, open decks of Garage #1 and Garage #2 had deteriorated badly, allowing water to penetrate cracks in the concrete deck and drip on parked cars below. In addition, moisture in the cracks attacks the reinforcing steel, causing additional damage.

Mobile Enterprises crews routed and sealed cracks and joints, shotblasted and waterblasted the surfaces and installed the SikaFloor 450 / 455 Traffic System. In addition, the parapet walls on all levels were prepared and coated with ElastoColor to match the original colors.

Our customer was very pleased with Mobile Enterprises, Inc. personnel and in the end product.
