

# WATERPROOFING

**Project:** NORTH CENTRAL  
EXPRESSWAY  
EXPANSION  
SECTIONS N-1 & N-2

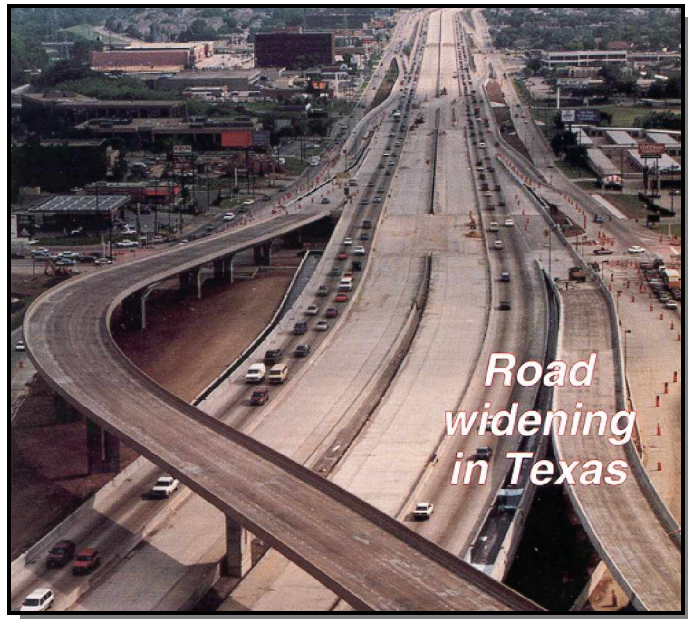

**System:** Type IV Waterproofing  
& Expansion Joints

**Completed:** 1994

A special provision in the North Central Expressway contract documents called for the installation of an Interior Planter Support System which consisted of over 21,000 lineal feet of Edge and Median Planters along the north and south bound lanes of the highway expansion.

Mobile Enterprises was contracted to treat all interior vertical and horizontal concrete planter surfaces with a preformed waterproofing membrane and one inch rigid insulation, and all interior joints with a compressible joint filler material.
